AUSPROTEC™

Avoid the risk of poor communication due to faulty cable terminations

1127 RG8 COAXIAL CABLE STRIPPING TOOL

The AusProTec Coaxial Stripping Tool provides a new and easy way to prepare your RCT communications cable for termination.

Specifically designed to complement the 1127 RG8 cable, this tool uses a unique, two stage stripping action to ensure that your 1127 RG8 10mm communications cable is prepared to the highest quality each time. The first action efficiently removes approx 10mm of the outer sheath, after which, the second action removes the insulation to allow for simple and easy termination.

AusProTec stripping tools are made with premium, long-lasting, tool steel cutting blades for a clean cable preparation. A good connection enables a high quality signal which provides superior communication.

Features

- Rugged design
- Tool steel cutting blades
- Easy 2 step operation
- Perfect result every time
