CONTROLMASTER®

# Protect personnel and machinery

## Independent Machine Containment System

The Control Master® Independent Machine Containment system has been developed to work in conjunction with radio remote control systems to prevent personnel entering and machinery exiting an allocated work area. This assists in the safe operation of radio remote controlled mining machinery in hazardous areas.

The system can also be used on manual control, ensuring machines are prevented from inadvertently entering a dangerous area.

It is a multi-component system consisting of the Machine Containment System control unit, CM1000 transceivers, dual scanners assembly, dual scanner reflector assembly and several wiring harnesses to suit.

### Характеристики

- Возможность работы при различных напряжениях
- 868 MHz frequency hopping, spread spectrum radio
- Up to 4 outputs to interface to machine
- Up to 4 inputs inputs (analogue or digital)
- Machine Containment System compatible
