CONTROLMASTER®

Get a close-up view from a safe distance away

Pan Tilt Zoom (PTZ) Solution for Tyre Handlers

The ControlMaster® Pan Tilt Zoom (PTZ) Camera reduces workplace health and safety risks associated with the tyre changing process on mobile mining equipment.

It provides a close and clear view of the tyre position which significantly reduces the likelihood of the tyre falling when attempting to position it on the wheel ends.

Designed to help make the task easier and safer to undertake, maintenance personnel changing tyres will no longer be near high-risk zones and have a better view of the correct wheel position.

Características

- Joystick control for easy pan/tilt operation of the camera, with 360-degree rotation
- Home or pre-set position function allows fast reposition of the camera to the most frequently used position
- Eliminate the need for personnel to be in the high-risk area
- Stability control reduces camera vibration for a clearer picture
- High magnification options assist in accurate wheel alignment
- Wiper function for a clean camera lens and clear picture
- Increased machine throughput due to quicker task completion
