

Are your current remotes backed by local support?

Concrete Trucks and Pumps

Concrete trucks and pumps are used for transferring liquid concrete. This task requires a high degree of accuracy due to the nature of concrete and the challenges in handling the material due to its heavy, viscous, abrasive nature which also solidifies if it's not kept moving.

Concrete trucks and pumps fitted with remotes help to maintain efficiency, safely on works sites. The pouring of concrete requires a high degree of accuracy each pour and conducting this task via remote gives the operator a better view of their surroundings eliminating the need to rely on a third party for guidance. Pumping concrete via remote control not only improves safety and efficiency; it allows operators to reduce interruptions and increase productivity which in turn saves time and money.

RCT's industrial remote range is manufactured in Australia to meet the high standards needed to withstand the harshest conditions. Most importantly all remotes are backed by local support as RCT customer service is readily available and easily accessible.

RCT has more than 40 years in the industrial sector; providing proven solutions to help businesses with the advantage of measurable value – increased profitability, productivity, efficiency and safety.

Features

- Light weight
- Fast recharge
- Full proportional joysticks
- Clear graphical colour display
- Adaptable across all machine types
- IP67

Specifications

Weight with battery	1.25kg
Charge time	3 hours
Display	Colour 180deg viewing angle
Operating temp	-15deg C to +65deg C
Dimensions	H 68mm x L 77mm x W 20 mm
Operation	16 Hours continuous

Parts

- 🔌 APN: 12558 Generic Loom to suit ARX2200 (Receiver)
- 🔌 APN: 12865 CHARGER LITHIUM ION MTX
- 🔌 APN: 12915 TRANSIT CASE MTX1000 KIT
- 🔌 APN: 12918 MTX1000 Handheld Transmitter for loaders
