

Manage access to prevent unlicensed and unauthorised operators from using mobile equipment

MACHINE ACCESS CONTROL

Every machine that is installed with the system is immobilised, by isolating the starter motor circuit (or ignition circuit), which prevents the use of the machine without a valid pin code or swipe card.

Each machine needs to be individually programmed by the site administrator or fleet manager to allow only their select personnel to operate them. The Muirhead® Machine Access Control is a simple, cost-effective, and reliable way to prevent unauthorised access to mobile machines or plant equipment.

Features:

- Over 500 unique users can be allocated.
- Wide range 12-28 nominal voltage.
- Allows keypad and pin users simultaneously.
- IP66 rated.
- Vandal-resistant design
- Operating temperatures between -40c-+60c, suitable for machines frequently operating within freezers.
- Suitable for IC forklifts, BE forklifts and fixed plant machinery including grinder wheels, drill presses, fuel stations, etc.
- Add/remove users through pin codes or a special card.

Parts

APN: 17502 Kit Access Control Combination Keypad & Card Reader 12V

APN: 17503 Kit Access Control Combination Keypad & Card Reader 24V

Optional Extras

APN: 6826 Driver Card

APN: 6828 Add Driver Card

APN: 6829 Remove Driver Card

APN: 17474 + 8455 Mounting Adaptor Plate to Allow Ram Mounting (requires 8455 Ball)
