

CONTROL MASTER COMMS TESTING

Remote Control Signal Strength Testing

Faulty Teleremote communication systems effect loader production and tons moved.

When the communication system is maintained and tested, it ensures more reliable remote control operation. The ControlMaster® signal strength kits are designed to allow for simple signal strength testing of a Teleremote communication system.

Two kits available: Data Signal Strength Kit (Part No. 12710) ensures reliable communication for machine control whilst in Teleremote Video Signal Strength Kit (Part No. 3934) ensure a clear image of operation is delivered to the operator station.

A comprehensive test of communications system functionality can be achieved by testing with both the data strength kit and video test transmitter kit.

Features

- Portable and simple to use
- Housed in strong enclosure to withstand harsh conditions

Specifications

System Voltage	12 volts
IP Rating	IP65
Operating Temperature	-25 deg C to 75 deg C
Frequency Range	472 to 490 Mhz

Parts

 APN: 3934

SINGLE VIDEO TRANSMITTER (USED FOR TESTING ANALOGUE COMMS SYSTEMS)

 APN: 12710

KIT TEST DATA SIGNAL STRENGTH REGION 3
