Smarter, safer seatbelt interlocks

SEATBELT INTERLOCK

Operator safety is of paramount importance in any operation. Operators neglecting to use a seatbelt are a hazard to both themselves and the operation. To ensure that the machine cannot be operated unless the seatbelt is securely fastened, RCT has developed the Muirhead Seatbelt Controller (SBC). It is one of the most cost effective, smart technology, seat belt interlock systems in the market.

The controller is programmed so operators apply the seat belt before operation. The SBC prevents operation of the machine and if not fitted will immobilise the machine. An audible and visual warning alerts the operator 5 seconds before immobilisation. The kits are designed to suit all machines types and models.

Customised Kits available on request.

Features
- Multi Voltage 8 to 32 volts
- Quick installation time
- Programmable engine shutdown time
- Fully sealed product to suit all conditions
- Improves operator safety
- Industry proven technology

Parts
- APN 9369  SEAT BELT PARK BRAKE KIT WITH IGNITION MOD
- APN 9561  CONTROL SBC WITH IGNITION MOD
