CONTROLMASTER®

Get More Work Out Of Your Skid Steer Loader!

Skid Steer Loaders - Agriculture & Farming

Your Skid Steer Loader is a versatile machine already. But you can demand more work without adding more danger. There are many jobs around the farm that are dangerous to operators of conventional Skid Steer Loader.

Specialized work can include: Flushing grain silos; Spreading chemicals or pesticide; Mucking manure; Building or repairing dams; Mixing compost; Stacking bales; Handling dangerous livestock; Slashing scrub; Cleaning water ways; Shifting snow fall; Cutting trenches; Dragging lumber; Fighting fires; Pushing back mud rushes

You can control these risks by upgrading your existing Skid Steer Loaders and support equipment with retrofitted RCT's advanced remote control systems. Your operators can remotely operate the loaders from a safe distance at the job site, sending their machines in to complete the dangerous work. Operators are protected as they have greater overall vision of the machine at work, making them more confident and more productive.

Benefits: Win more specialized work; Lift billable hours; Protect your people; Multi task machines and operators; Scalable options

Features

- Line-of-Sight remote control (radio remote)
- Teleremote (video)
