

# Assistance to setup a vast range of products

## Frequency Generator & Specialised Electrical Pulse Width Modulator

The AusProTec™ Frequency Generator and Pulse Width Modulator can be utilised in the setup of various Muirhead® products.

The frequency generator can be used to assist in setting up all units that receive a speed signal or PWM inputs.

This unit can also be used for external purposes and is not just limited to the RCT range.

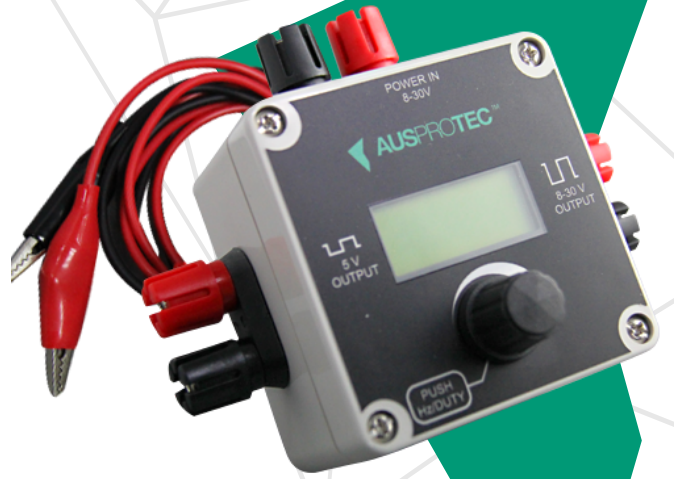

### Caractéristiques

- The input can power the unit up and charges the internal rechargeable 9V battery
- Reverse polarity protection

### Pièces

APN: 2056

FREQUENCY GENERATOR

### Specifications

Input:	8 – 30VDC
Output:	20mA

Reference: SBAP0609045
