

Data & information solutions for better insights and informed decisions.

How you can benefit from data and information?

The amount of operational and workforce data generated by mining and industrial businesses grow by the day, but few companies know how to harness it to improve operations and profit from the information.

Our sophisticated solutions open the door to a whole new world of possibilities, fueling faster and better forecasting and planning, with the end result of a safer worksite, smarter performance and better decision-making.

Better insights into your workforce and fleet

Increased operational efficiency

Business process automation and digital transformation

Data-driven product innovation

Improve profits from smart decision making

Improved safety intelligence

Vehicle monitoring

Designed to fit all vehicle types and sizes. The solution provides relevant vehicle and operator data, resulting in better decision-making for mining companies to drive efficiencies.

Digital checklist

Better address the complexities of operational risk management and deliver the machine and operator data from multiple sites; all under one platform.

Industrial fleet management

Empower users with real-time information across all types of industrial mobile equipment from multiple locations, anytime, anywhere.

Payload management

Maximise the productivity of your earthmoving fleet with production monitoring systems that assist operators to achieve the optimum payload every single time.

Machine data gateway

Unlocks, gathers and collates machine data in a consolidated format to be uploaded to your business analytics software for actionable insights.
