

Create a safer working environment

Battery isolators

ISOLATOR LOCKOUT BRACKET

Part No. 1103

Create a safer working environment for maintenance staff and increase security for mobile equipment with RCT's Isolator Lockout Bracket. This bracket suits the common Cole Hersee/Britax style battery isolators and provides a positive lockout in the off position. This ensures the safety of staff working on or around the machine, and decreases the likelihood of theft.

ISOLATOR DUAL POLE

Part No. 1700

If the electrical charges are not removed from a machine system this could be hazardous to personnel working on the machine.

RCT's Isolator Dual Pole is a weather resistant dual pole master disconnect switch which isolates the battery and takes charge out of the system.

The switch is constructed from plated steel and has an indexing pin to align the unit and prevent rotation. The operating shaft is o-ring sealed and the terminal insulator is sealed with a gasket.

ISOLATOR MOUNT

Part No. 4300

Secure and safe attachment of the battery isolators is important for efficient operation. RCT's Isolator Mount bracket enables easy installation of the battery isolator.

Made from plated steel, the bracket can be welded to the vehicle or bolted on utilising the 2 x 10mm diameter mounting holes (85mm centres).

Parts

-  APN: 1103 LOCKOUT BRACKET RED HINGE STYLE TO SUIT 1700
-  APN: 1700 BATTERY ISOLATOR 24V DUAL POLE INDEX PIN - COLE HERSEE # 75910
-  APN: 4300 MOUNT BRACKET RIGHT ANGLE TO SUIT 1700
