

# GPS ASSET TRACKER

Tired of the exhausting task  
of manually tracking your fleet?

RCT's GPS asset tracker is here to revolutionise your fleet management. With curated reports and customisable features, managing your assets has never been easier.

Experience the benefits of our low-cost solution, providing unparalleled visibility of asset usage without straining your budget. With simplified reporting, accessing powerful data requires minimal effort, saving you valuable time and resources.

Our solution offers flexibility, seamlessly adapting to any machine or fixed plant asset in your fleet. Plus, with RCT's expert installation, integration, and technical support, you can trust that your system will be up and running smoothly.

Receive reports directly to your email or API for effortless data access, all while ensuring your sensitive information is safeguarded.

## MAIN FEATURES

### ACHIEVE RAPID ROI

With remote data acquisition, eliminating on-site meter check.

### GPS LOCATION AWARENESS

Know exactly where your assets are at all times.

### GEOFENCE CROSSING ALERTS

Receive alerts when machines enter or leave designated areas.

### OVERSPEED ALERTS

Monitor groundspeed and receive alerts for speeding incidents.

### MACHINE UTILISATION TRACKING

Measure actual work hours to optimise asset usage.

### REMOTE SERVICE METER

Stay on top of maintenance schedules with accurate service alerts.

### REMOTE ASSET INHIBITION

Control machine usage remotely for maintenance or safety reasons.

### INTEGRATION CAPABILITIES

Customise alerts with auxiliary device integration.\*

## SYSTEM BENEFITS

- ✓ Increase fleet visibility, location, and health monitoring
- ✓ Enhance operational efficiency with automated reporting.
- ✓ Improve asset utilisation and maintenance scheduling.
- ✓ Ensure safety and compliance with geofencing and overspeed alerts.

**Don't let  
manual fleet tracking  
hold you back.**

Upgrade to RCT's GPS Asset Tracker today and unlock the full potential of your fleet management.
