CONTROLMASTER®

Don’t risk physical injury during ripping operations!

Cap Rock and Frozen Material Ripping

An operator engaged in cap rock/ frozen material ripping is forced to endure awkward ergonomics while his body absorbs the forces of this high impact operation.

Removing the operator from the dozer allows him to safely and comfortably control the ripping operation remotely for an extended period of time, yielding higher productivity.

RCT has over 40 year’s experience with machine control & safety solutions. Others talk; we are the real deal, with over 1000 working examples in 60 countries. If you’re serious about safe mining then we’re serious about helping you.

Features

- Multiple options of remote control solutions
- OHS issues are minimized
- Operator can control the machine from ground level, control room, pickup mounted station or the cabin of the dragline
- Total flexibility of remote/manual control
- Complete technical support & training
