

Smart LED Lighting

Multi-functional LED Nylon Series Lights

These lights were specially designed to replace a range of original equipment lamps. The Multi-Functional LED Nylon Series lights are suitable for grommet style stop lights, tail and clearance lights and directional indicator lights.

Constructed from resilient all-weather nylon, these lights are built to last and won't corrode like cast aluminium lights or deteriorate like some grommet-style lights available in the market today.

High-intensity LED's provide a constant, high-power light over an extended service life.
