

Reduce the risk of an accident - avoid unseen obstructions

XTREME PREVIEW™ RADAR DETECTION SYSTEM

Detect both stationary and moving obstacles to avoid collision.

The Xtreme PreView Radar Detection System identifies objects in a pre-determined coverage area with an alert sent to the operator to avoid the harmful obstruction.

The Xtreme PreView Radar Detection System is a solid-state, pulsed radar object detection system which reports the distance of the closest detected object via visual range indicators with an audible signal sent to the vehicle operator.

Features

- Environmentally sealed sensor
- Operator display mounted in the vehicle cab
- Up to 10m/32ft detection range
- Detects objects in blind spots
- Active notification to operators of detected objects
